Best game ever.. THIS is no joke lit 69V10. lazily made. This game is horrible there is too much pay to win.. very good game that you will never regret it. EDIT: The scam goes even deeper! They have a new game on Greenlight - please vote against it being greenlit, they just reskin the same game and sell it as new:

[Massive is a scam. Besides being a horrible knock off of Nuclear Throne, it's the same exact game as Gun Brothers... check it out for yourself and you tell me otherwise.](#)

<http://store.steampowered.com/app/514410/>

[Hell even the sale page is identical right down to the layout of the graphics, and that pruple skull enemy thing... it's just slightly altered on one. xD](#)

[They're developping 1 game under 2 different titles and publisher/developer names. One game is also slightly reskinned... It saddens me to see people getting ripped off. Selling the same reskinned game while it is still in development - twice, is seriously an insult! Maybe even fraudulent.](#)

[Publisher: Massive Game](#)

[Gun Brothers](#)

[Developer: GameDevCom](#)

[Publisher: GameDevCom](#)

[Does that not sound deceitful?](#)

[Also note that as of this review update, both Massive and Gun Brothers are still currently in early access and if Steam is going to continue to sell both, I would only hope that the differences in both final products \(as well as needed fixes\) justify a \\$9.99 x2 price point \(though by the looks of it, I highly doubt it\).](#)

[NOTE: A great part of this review is copy/paste from HERE, I only somewhat changed it to match my views.. You get 5 pathetically short levels with one new background basically. Maybe take you 20 mins or less. In no way worth it.. This is an interesting kinetic novel. While the premise appears to have started as a joke, the story that the author tells is thought-provoking and a fun read.](#)

[Fully recommend.](#)

If you like college basketball and sport sims good game. Interface and a few options could use work. Once you get pass the learning curve its a good game.. I love this game. I love that it's Bejeweled with a storyline! You're a dude who is fighting his way through dungeons by matching the tiles below. He needs a score of 10,000,000 (the name of the game) in order to be free. Each tile does its own thing and are not always suited for the task at hand, but the game advises you to just make the matches you can because it's better than doing nothing. And it's true! The scene above the tiles, is a side scroller that wants to push you off the screen. So just keep making those matches and hope some of them line up to be what you need otherwise, you'll find yourself back in your room needing to start over. There's also an upgrade system that will help you get better and stronger and tasks you can complete for a boost in gold, experience, or materials you need. Really it's a stellar game and even though it only has like 3 songs, they are bopping! I highly recommend this game. It's addicting!. Definitely a great game. I love the destruction, battles, missions, and the general creativity allowed. A bit heavy on the frames though.. A good DLC that provides some great challenge campaigns.. I love this game really good, beautiful graphics, amazing storyline really kept me gripped throughout and was kinda spooky at times, all and all really great game but I cannot find the sound track for it can anyone help?. It's a bit short, but the story is great. Wouldn't buy it for full price though I feel it's to short for that price tag.. A good 1\$ minimalist puzzle game with 60 levels, around 2h long. If you like this kind (like Hook, Zenge, etc..) you won't be disappointed, there are achievements, relaxing music and the game is polished. The only downside is that the graphic design is not very obvious for the brain, for instance what is clickable does not differentiate enough from what is not clickable, also some levels can look confusing at first glance and be easy in reality, but we can forgive these flaws because the level design is interesting and it has an overall well calibrated level of difficulty. 7/10. Still one of the best psychological horror games in VR. If you enjoy amnesia, outlast, penumbra (there is a mod to play overture in VR) and the like in flatscreen. Then you have to play this in VR it's just as intense and with the added pressure of VR it makes it horrifying.

Gameplay: strong language due to being♥♥♥♥♥scared.
